and Ready  
to Keep  
People Safe  
at Work.

**FireCombat**

**Customized Industrial  
Fire Suppression Systems**

*In today's world, having reliable fire suppression products available to protect personnel and high valued equipment is critical. Fire Combat has over a quarter-century of hands on experience in designing, engineering and manufacturing fire fighting systems. Our mobile fire suppression products are recognized worldwide for their superior quality and service – we welcome the opportunity to protect you and your facility.*

### **Twin Agent**

- Totally self-contained
- Can be configured with dry chemical, AFFF and/or clean agent
- Easy to maintain
- Fully field rechargeable
- Designed for use by one operator for quick first response
- Custom designed systems for your specific application

### **Halotron**

- An environmentally acceptable replacement for truck mounted Halon 1211 systems
- Custom designs available
- System includes a liquid level gauge with available remote readout
- Wide range of options in design to meet specific requirements of all truck configurations

### **Defender One**

- Rugged stand-alone fire fighting system
- Trailer mounted mobile automatic fire detection and fire suppression system
- A totally independent, self-contained unmanned fire fighting system
- Integrates with common radio transceivers and most fire panels
- Operates on AC power or maintenance-free battery with solar panel recharging

### **CAFS Model 80**

- Provides medium expansion foam for rapid flame knockdown
- Compact skid mount
- Custom configurations available
- Totally self contained with rugged construction
- Can be customer configured for trailers and OEM applications

### **CAFS Model 80/C**

- Provides a medium expansion foam for rapid flame knockdown
- Compact skid mount perfect for standard truck beds
- Can be custom configured for trailers and OEM applications
- Totally self-contained with rugged construction for long service life

### **Dry Chemical Stationary**

- Designed for one person operation
- Can be configured for multiple application points
- Complies with NFPA 17, critical components meet ASME and DOT codes
- Agent capacities range from 500-4000 lbs.

### **Dry Chemical Mobile**

- Can be designed as a skid, trailer or component system
- Built to fit most standard truck bed sizes or custom configured for OEM applications
- Designed for either one or 2 person operation
- Agent capacities 500-2000 lbs

### **Foam Trailers**

- Built to US DOT 49 CFR 393 standards
- Custom designed to your needs
- Multiple tote and/or apparatus designs available
